Upayan Mazumder

Full-Stack & Platform Engineer

+91 8509701939 | upayanm3@gmail.com | upayan.dev | LinkedIn: upayanmazumder | GitHub: upayanmazumder

Education

Vellore Institute of Technology **Jul. 2024 – Present**
B.Tech. in Computer Science and Engineering (Data Science) *Vellore, India*

Indian Institute of Technology Madras **Jun. 2024 – Present**
B.S. in Data Science and Applications *Remote*

Technical Skills

Languages: Go, Rust, Python, TypeScript, SQL
Core: Data Structures & Algorithms, SDLC
Frameworks: React, Next.js, FastAPI, Express, Node.js, Tailwind CSS, GSAP
Databases: PostgreSQL, MongoDB, Redis, SQLite, MinIO, Firebase
Infra: Git, Docker, Kubernetes, KEDA, ArgoCD, Terraform, Ansible, Cloudflare, GitHub Actions, Linux
Observability & Security: Prometheus, Grafana, SOPS, Restic

Experience

797th LLC **Oct. 2026 – Present**
Junior Software Engineer *Remote*
- Migrated a 10-stage LLM content pipeline from Python/LangGraph to Rust with close attention to detail, backed by unit and regression test suites validating parity against the Python original.
- Implement critique and fact-check quality loops with bounded revision across six content templates, producing Ghost drafts for human review.

KalkiNi **Dec. 2024 – Mar. 2025**
Frontend Web Development Intern *Vellore, India*
- Built 15+ reusable React/TypeScript UI components with Tailwind CSS for production apps.
- Implemented application workflows and integrated secure payment functionality for checkout.

BBN Music **Jun. 2023 – Mar. 2025**
Digital Engagement & Junior Developer *Remote*
- Developed 10+ frontend features for an artist community platform, contributing to a 15% increase in user engagement.
- Improved page performance and integrated advertising modules for monetization.

Projects

VCAP: Capstone & Course Project Platform | *Next.js, Go, FastAPI, PostgreSQL, Redis, Kubernetes, ArgoCD* **Mar. 2026 – Present**
- Lead frontend development for a project-management platform used across B.Tech and M.Tech courses, collaborating cross-functionally on FastAPI and Go REST services with unit and integration tests.
- Manage Kubernetes infrastructure, GitOps deployments with ArgoCD and KEDA autoscaling, and Prometheus/Grafana monitoring.

Kargo: Kubernetes Deployment Platform | *Kubernetes, TypeScript, Express, MongoDB, Docker* **May 2025 – Oct. 2025**
- Built and maintained a Kubernetes platform for deploying Dockerized applications with a guided setup workflow.
- Designed RESTful backend APIs, authentication, and multi-tenant project management; built CI/CD pipelines for container builds and rolling deployments.

Papers: Exam Paper Distribution Platform | *Next.js, TypeScript, PostgreSQL, Cloud Infrastructure* **Apr. 2025 – Sep. 2026**
- Maintained a production platform distributing VIT examination papers to **134K+ users** with **3.3M+ page views**.
- Shipped features, diagnosed and resolved reliability issues, and optimized content delivery and application performance.

Leadership / Extracurricular

GDG on Campus VIT **Apr. 2025 – Present**
Inner Core Member *Vellore, India*
- Technical contributor to three chapter projects: Kargo (Kubernetes deployment platform), the chapter's recruitment portal, and The Memory Book (map-based travel-memory platform).

CodeChef-VIT **Feb. 2025 – Sep. 2026**
Core Member *Vellore, India*
- Contributed to CookOff 10, DevSoc '26, FFCS-inator, and Papers for the chapter's software initiatives.

Open Source & Achievements

- Contributor to Microsoft PowerToys and SeaweedFS.
- Hacktoberfest 2025 Super Contributor.
- Won CodeChef Internal Hackathon 2025 by building KodeSphere, a cloud-native deployment platform with automated container provisioning.
