Summary

Computer Science student and Project Lead at CodeChef-VIT, building production software used by tens of thousands of students, including Papers (90,000+ users) and VCAP, a VIT project submission portal. Lead developer of Kargo, a Kubernetes-native deployment platform. Focused on backend systems and cloud infrastructure.

Education

Vellore Institute of Technology

B.Tech, Computer Science and Engineering (Data Science)

Jul 2024 – Present

Indian Institute of Technology

B.S., Data Science and Applications

Jun 2024 – Present

Technical Skills

Languages: Java, Go, Python, TypeScript, SQL

Frontend: Next.js, Qwik, TanStack Query, Zustand, Tailwind CSS

Backend: Node.js, Express, FastAPI, Flask, REST APIs, GraphQL

Databases: PostgreSQL, MongoDB, Redis, SQLite

Cloud & DevOps: Docker, Kubernetes, KEDA, ArgoCD, GitHub Actions, Linux, CI/CD

Experience

CodeChef-VIT

Jul 2026 – Present

Project Lead

- Own technical planning, code reviews, and release management for club engineering projects.
- Establish and enforce engineering best practices to help contributors ship scalable, maintainable code.

KalkiNi

Dec 2024 – Mar 2025

Frontend Web Development Intern — Vellore, India (Hybrid)

- Built 15+ reusable, responsive UI components using React, TypeScript, and Tailwind CSS.
- Implemented interactive UI modules and integrated secure payment workflows, enabling seamless checkout experiences in production.

BBN Music

Jun 2023 – Mar 2025

Digital Engagement & Junior Developer — United States (Remote)

- Built 10+ frontend features for an artist community platform, increasing user engagement by 15%.
- Improved page load performance and integrated advertising modules to expand platform reach and monetization.

Projects

VCAP

Frontend Lead & Deployments Lead — VIT

Mar 2026 – Present

- Lead the frontend team for VCAP, a project submission portal used by thousands of VIT students to submit projects.
- Build the frontend with React, TanStack Query, and Zustand, and contribute to the FastAPI backend, including LaTeX-based workers for automated document generation.
- Singlehandedly own deployment infrastructure using Kubernetes, KEDA for event-driven autoscaling, and ArgoCD for GitOps-based continuous deployment.

Papers (GitHub)

Contributor & Maintainer — CodeChef VIT

Apr 2025 – Present

- Maintain a production platform distributing past VIT exam papers to **90,000+ users**, generating **2.1M+ page views**.
- Ship new features, resolve production bugs, and optimize content delivery for faster load times.

Kargo (GitHub: backend / frontend)

Lead Developer & Maintainer — GDG on Campus VIT

May 2025 – Present

- Architect a Kubernetes-native PaaS enabling users to deploy Dockerized applications through an AI-assisted setup flow.
- Design and implement backend APIs and authentication for multi-tenant deployment and project management.
- Build automated CI/CD pipelines for containerized builds, image publishing, and rolling production deployments.
- Engineer secure, scalable infrastructure for container orchestration, resource isolation, and deployment rollback.

Leadership & Activities

CodeChef-VIT - Core Committee Member

Drive technical roadmap and project ownership decisions as part of the club's core committee.

GDG on Campus VIT - Inner Core Member

Contribute to technical direction and execution of GDG on Campus VIT initiatives and events.

Achievements

- Contributor to Microsoft PowerToys
- Hacktoberfest 2025 Super Contributor
